

The intelligent climate control system for a healthy horse stable

Clear airways, relaxed horses and a noticeably better stable climate – our professional high-pressure climate control system from **Equine-Cool** ensures optimal conditions in the stable all year round. Ultra-fine water mist cools, cleans and humidifies the air – quietly, efficiently and in a completely animal-friendly manner.

Equine-Cool is an investment in the health, performance and value retention of your stable:

- ✓ **protection against heat stress and insects**
- ✓ **better air quality thanks to less dust and pollen**
- ✓ **calmer, high-performing horses**
- ✓ **industrial quality for long-term use**

Smart remote monitoring – plus 24-hour service

With **Equine-Cool**, you have full control over your system at all times. Our systems send real-time data on system performance, supplemented by our 24-hour service, so we are always there for you – fast, competent and solution-oriented.

Your advantages:

- ✓ **real-time remote monitoring**
- ✓ **24-hour service worldwide**
- ✓ **regular maintenance & functional checks**
- ✓ **optimisation according to your needs**
- ✓ **personal contact person**
- ✓ **customer service with annual maintenance contract**

Let's get started – we look forward to your call!

EQUINE COOL

STABLE CLIMATE SOLUTIONS by GROWA

Quality – developed for the daily demands of the stable

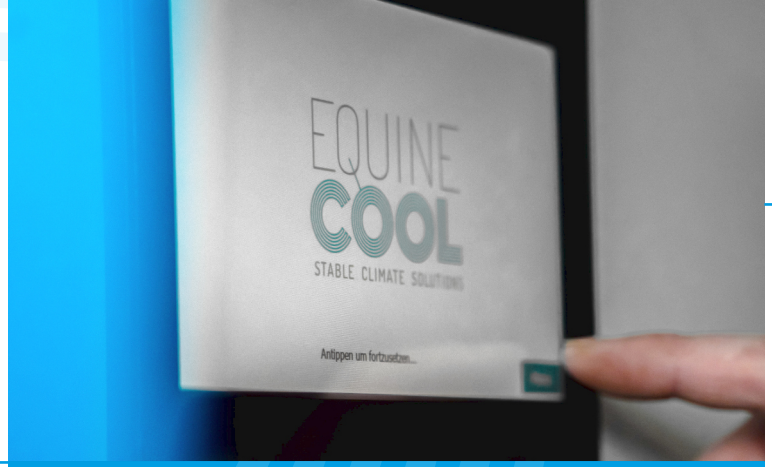

Equine-Cool systems are engineered, designed and manufactured entirely in-house, guaranteeing the highest quality standards and exceptional systems that function reliably even under intensive use.

All components meet industrial quality standards and are designed for durability, continuous operation and minimal maintenance. The high-quality stainless steel pipes are ideal for damp stable environments and offer maximum service life without rust.

Our guarantee:

- ✓ **durable and reliable**
- ✓ **minimal upkeep and operational effort**
- ✓ **high-quality stainless steel pipes**
- ✓ **standard 2-year warranty extendable with maintenance agreement to 5 years for the pump system and to 7 years for pipes**
- ✓ **ultra-fine water mist of 5 µm**
- ✓ **rust-free nozzles with ceramic inserts, therefore a 10-year warranty on consistent 5 µm droplet size**

Planning & Service – personal consultation on site

No two stables are alike – that's why every **Equine-Cool** system is tailor-made.

Our expert consultants accompany you personally on site from the very beginning, analyse your individual requirements and develop a highly efficient system that fits your stable and your processes perfectly.

Our planning includes in particular:

- ✓ **stable size, construction and ventilation situation**
- ✓ **power supply and desired zones**
- ✓ **number and performance of pumps**
- ✓ **exact position and number of nozzles**
- ✓ **application areas: cooling, humidification, dust binding, insect reduction**
- ✓ **detailed technical drawings and on request, realistic 3D planning**

Technology – precise and powerful

Equine-Cool combines state-of-the-art technology with many years of experience in professional stable climate management. Only high-quality, proven components are used:

- ✓ **high-pressure system with 80 - 120 bar**
- ✓ **ultra-fine water mist (3 - 5 µm)**
- ✓ **stainless steel nozzles with ceramic inserts**
- ✓ **multi-stage filtration for consistent performance and water quality**
- ✓ **uniform, residue-free misting**

The nozzles continuously produce ultra-fine water droplets in the ideal size for maximum cooling performance – without causing wetness.

Thanks to modular expansion options, the system is flexibly scalable. Even large equine facilities can be supplied evenly and efficiently.
